

How to separate the waste

You have told us about the waste that you want to dispose of. We have given you black and / or red bags accordingly. Please use the bags as follows:

❖ **Black bag for general harmless waste**

i.e. galley waste, plastic, tins, paper, glass etc.

! Everything can go in one bag !

❖ **Red bag for non harmless waste**

! Please use a different red bag for each group of non harmless waste !

Group 1:	i.e. oil contaminated workshop-waste, gloves, rags etc.
Group 2:	i.e. chemical residue, paint residue, detergents, medicine etc.
Group 3:	fluorescent lamps
Group 4:	dry batteries
Group 5:	wet and starter batteries, lead-acid accus.

- ❖ When the bags are ready, please phone the harbourmaster on +49 (0) 4852 – 88441.
- ❖ The harbourmaster will then come to your ship with a suitable vehicle.
- ❖ Please load your waste onto the vehicle. The harbourmaster checks and signs for it accordingly.
- ❖ The signed form is your proof for waste disposal. Please keep it safe as you might need to show it on request.

! Do not – under any circumstances – leave any waste on the pier !

Please contact your agent or the harbourmaster for all further information.
